

With or without cylinder?

You decide.

Both versions - with and without cylinder - feature Advantage Plus+ which allows users to remove the cylinder for rekeying while the lock remains in place. No mounting screws need to be removed.

SC Advantage cabinet locks can be masterkeyed to door hardware using the Schlage C keyway - or other manufacturers' cylinders such as Medeco, ASSA,

Schlage and more - providing the convenience of single key operation. For a video of SC Advantage and the Advantage Plus+ feature, see <http://compX.com/scadvantage.html>

Only from CompX Security Products, the one-stop supplier for pin, disc, keyless & electronic cabinet locks.
